

MEDICAL EDUCATION LITERATURE SEARCHING Going beyond PubMed

PubMed	View the "+MeSH" link below an abstract to find MeSH terms to refine your search
Web of Science	<ul style="list-style-type: none"> Run a title search or use the <u>Cited Reference Search</u> feature to see who's cited an interesting article that you probably found in PubMed You can also use their Search interface to find other literature that is not in PubMed because it contains citations from not only PubMed but also arts, social sciences, and humanities databases This database does NOT have keywords or descriptors assigned to any citations
ERIC	<ul style="list-style-type: none"> Searches education literature; will include some citations that were in PubMed, but offers a whole lot more than just articles: journals, books, reports, dissertations, etc In your initial search in the Advanced Search mode, use the MeSH terms that you found helpful in PubMed if you think it would help develop a good first search View the <u>descriptors</u> assigned to each abstract to refine your search
PsycINFO	Search the same way as you would search ERIC; also includes some citations that are in PubMed
JSTOR	Popular humanities and science database used in academia
Academic Search Complete	A multidisciplinary database providing full text access to scholarly and general interest journals, magazines, books, and reports
Business Source Complete	Searches the business literature

Below are some screen shots of how to search ERIC as a quick reminder. The same applies to searching the PsycINFO database.

ERIC: the primary database for education literature

- Use this database to find articles that may not be in PubMed
- Includes items from journal articles, conferences, books, dissertations, book reviews, essays (PubMed only includes journal articles)

1) Link to this database via the **Databases** link on the Library homepage

2) Use the **Advanced Search** tab – type in search terms

(Select options of where to search for terms – ie: *abstract, title, anywhere*)

1. [Visualizing the Future: Technology Competency Development in Clinical Medicine, and Implications for Medical Education](#)
Srinivasan, Malathi; Keenan, Craig R.; Yager, Joel
Academic Psychiatry; v30 n6 p480-490 Dec 2006
Objective: In this article, the authors ask three questions. First, what will physicians need to know in order to be effective in the future? Second, what role will technology play in achieving that high level of effectiveness? Third, what specific ...

5) Select tabs to display only those results;

6) Browse the **Descriptors** listed on the right – these are like MeSH terms

7) Jot down relevant descriptors and use these to refine your search

(use the **Edit Search** link at the top to refine your search)
