Re: [redacted]

Dear [redacted],

The [redacted] has been a tremendous asset to UCSF by cultivating a community of [redacted] that cross traditional department boundaries. This has been particularly helpful for UCSF Foundation, as we strive to engage UCSF partners to support programmatic development and growth. It is clear that UCSF has considerable strengths in basic science, skeletal biology, imaging and early translational science, and the programs that you lead help maximize the potential to impact human health and train the next generation of scientists.

I look forward to continuing our collaboration to identify meaningful ways for our network to partner with us to craft and realize this vision by building the structure and developing the muscle that will propel the next transformative discoveries in musculoskeletal health.

Sincerely,

Darrell Young
Senior Director of Development
UCSF Foundation
